

# A new vision for sound

Beosound Theatre reinvents what the home cinema experience can be. All the power, clarity and immersion of a multi-speaker setup. But from one beautiful soundbar that slots in seamlessly with any screen.

No black boxes, no cable clutter. Four patent-pending acoustic innovations in one sleek soundbar envelop you in sound from every angle.

Made with materials as beautiful as they are durable, Beosound Theatre is made to last for generations.

Make every movie an unmissable cinematic event.

## Important features

-  Sound that surrounds
-  All beauty. No clutter
-  For generations to come

Basic

WEIGHT  
18 kg

PLACEMENT  
Table or wall

## Product Description

### A new vision for sound

A technological and aesthetic masterwork, years in the making. Made for years to come. Beosound Theatre completely changes the soundbar game.

Featuring four patent-pending Bang & Olufsen acoustic innovations, Beosound Theatre is the world's first single soundbar that delivers the immersive surround sound, clarity of speech and serious bass previously only possible with multi-speaker setups.

One beautiful, sculptural piece allows any TV screen to be slotted in, with all cables cleverly hidden away. Distracting tech clutter? It's a thing of the past.

Prepare to turn your TV into a work of art and transform every movie moment into an unmissable cinematic event – elevated beyond what should be possible.

**Key Selling Points**
**Eyes front. Ears everywhere.**

When you hear every detail from every angle, you're not just watching a movie. You're in it.

Experience immersive Dolby Atmos surround sound and impactful bass without the need for extra boxes. Hear things above, below and to the sides in 3D space with absolute fidelity. A coaxial centre channel ensures crystal clear speech, so you won't miss a word or whisper. The way it should be.

All this power in one sleek, sculptural piece that integrates seamlessly with any TV – and it only takes a minute to set up. Enjoy a cinematic experience as the director intended, right at home.

**No clutter. All connection.**

Technology should liberate your listening experience, not take over your home. Beosound Theatre follows this mantra by not making you compromise design for sound quality, breaking the mould of what's possible. This single, sleek soundbar delivers an immersive home cinema experience without the usual bulky black boxes and chaotic cables.

You can slot almost any TV into Beosound Theatre, so you won't need to replace it if you decide to update your screen. It's also made to integrate with your interior through multiple customisation options. In true Bang & Olufsen style, we designed

Beosound Theatre like a boat's keel, sitting atop an aluminium blade to give the impression that your TV is floating in the air. A touch of magic that also serves a purpose: cleverly hiding cable clutter to present one fluid, beautiful form.

Smart. Stylish. Simple. All you need is one speaker to bring the cinema home.

**For generations to come.**

Good things never last? Beosound Theatre proves otherwise. It's designed to be updated instead of replaced, with software that can evolve over time to bring new features. Time for a bigger screen? Slot a new one in. This modular approach means Beosound Theatre will continue to deliver a spine-tingling cinema experience for years to come.

Beosound Theatre is built on cutting-edge audio technology, but it also respects the past. You can connect it with classic Bang & Olufsen speakers stretching back to the 80s, bringing a new lease of life to your most loved pieces and elevating them to a multichannel sound experience.

This is next generation listening. For generations to come.

# Style it to your space

No black boxes blocking the screen.  
 No cables cluttering up your space.

This is stunning home cinema sound made simple. Whether wall mounted or poised on its stand, Beosound Theatre integrates with almost any TV through elegant, adjustable screen interface that creates a perfect silhouette for every set.

Wherever you place it, it's perfectly positioned to bring cinema to life.
