Industrial 0.78" DMD Chip

The powerful 0.78" DMD chip features 2.8x more reflective area than 0.47" chips. Enjoy sharper details, higher brightness, and vibrant contrast - even in well-lit rooms.

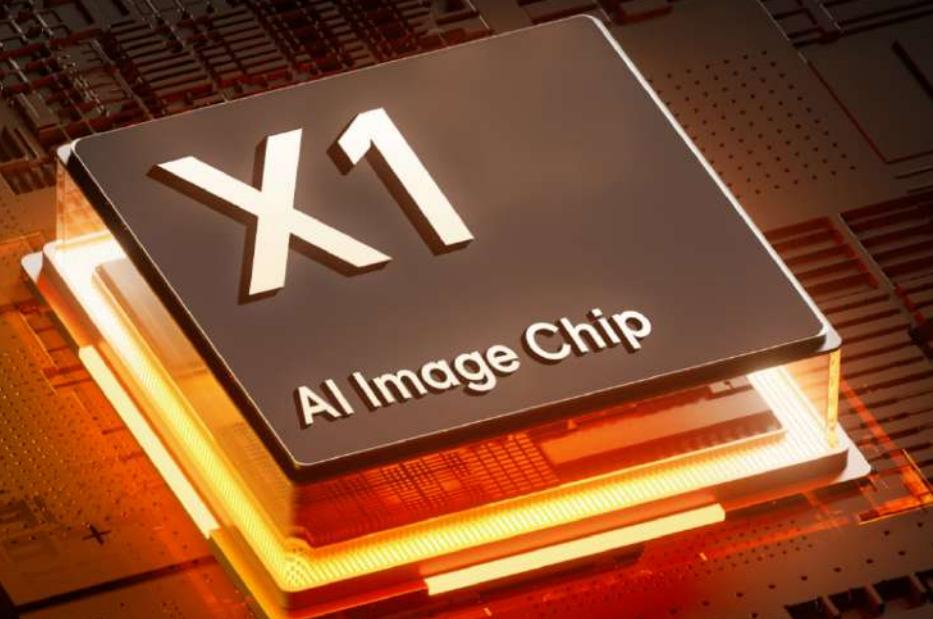

XGIMI Self-Developed Optical System

XGIMI X1 AI Image Chip

Our First Self-Developed 4K-Grade AI Processor

XGIMI X1 has been purpose-built in-house to deliver consistent image excellence. While generic image processors treat every frame the same, XGIMI X1 leverages AI technology to analyze and improve each frame in real-time – displaying entertainment in sharper detail, better contrast, and more accurate colors.

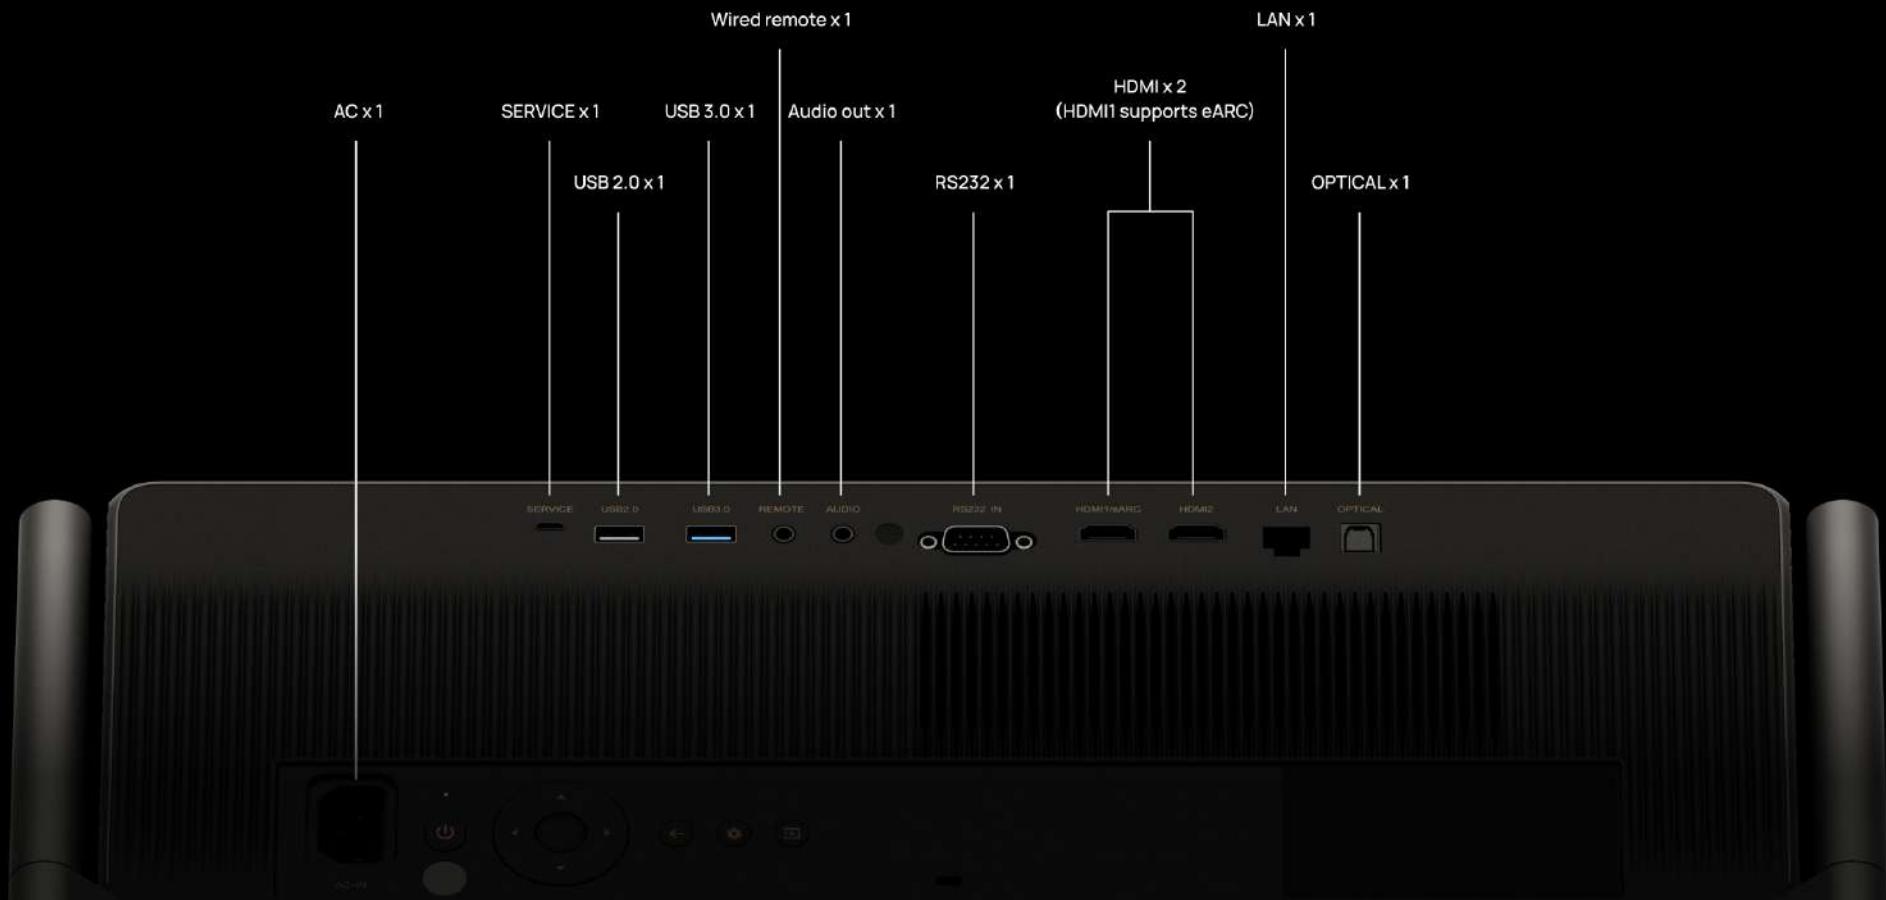

Built-In Adapter, Clean Setup

With the adapter built into the body, setup is seamless and clean for a clutter-free ceiling installation.

Full Connectivity for Modern Living

4K 5000 ISO Lumens – Brightness Without Compromise

Unmatched Brightness at Home

Ultra High Definition

Brilliant Colors

True Home Theater in Any Living Room

Commercial-grade 5000 ISO Lumens with native 4K UHD – vivid, detailed visuals even in ambient light, with no blackout curtains required.

Peak brightness of 3000-4000 ISO Lumens – faded images with daylight present, requiring a darkened room.

Bring the 3D Movie Experience Home

TITAN supports 3D movies for a true big-screen theater feel – an extra touch rarely found in other ultra-bright projectors.

No Performance Trade-Offs

Powered by a 0.78" HEP Imaging Chip, advanced XGIMI X1 AI processor, and a dual laser light engine – delivering brilliant 4K detail, perfect image geometry, and stunning brightness.

Must choose between high brightness or high resolution – resulting in either washed-out colors or a lack of image sharpness.

Flexible Placement with Automated Lens Shifting

Pro-level Automated Lens Shift Module for precise vertical and horizontal image adjustment – extends viewing range with zero setup time or image distortion.

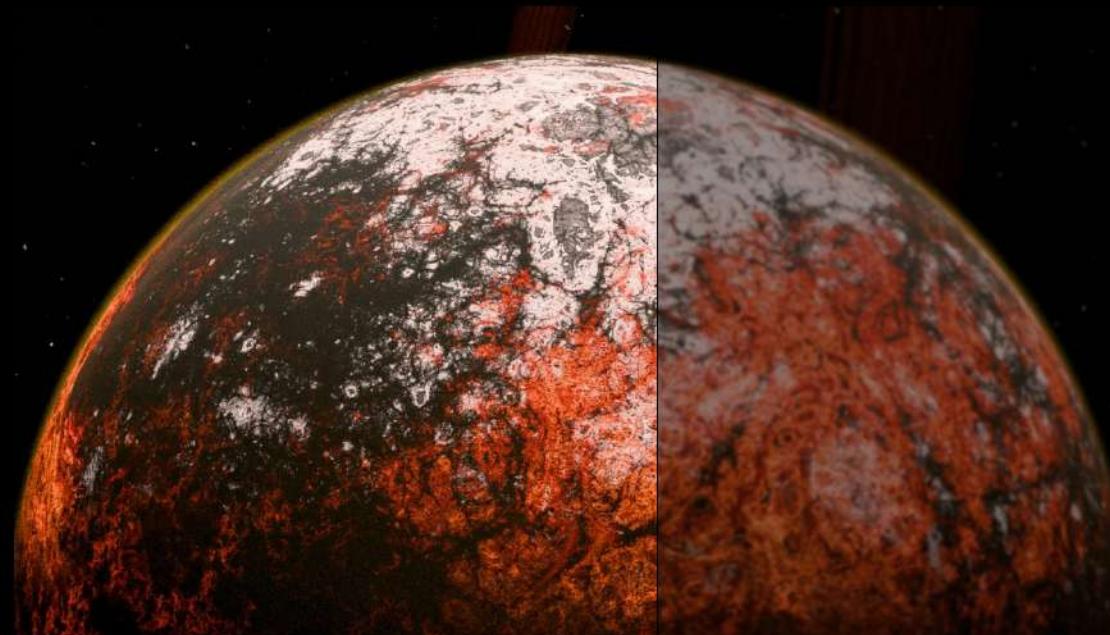

Fixed or limited manual lens shifting – must resort to constraining ceiling mounts or awkward furniture arrangements.

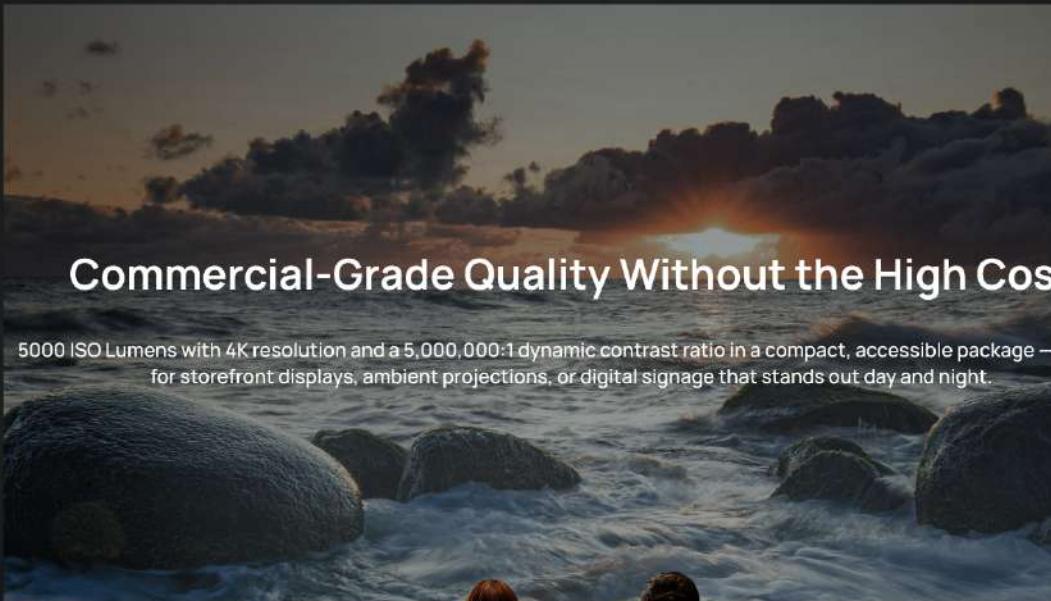

Unparalleled Imagery – Bright, Bold, True to Life

Full 100% DCI-P3 color gamut, 5,000,000:1 dynamic contrast ratio, Dolby Vision, IMAX Enhanced, HDR10+, Filmmaker Mode – complete cinematic image quality in one projector.

Low brightness, poor contrast, or muted colors – resulting in murky shadows, lifeless images, and lost detail.

Commercial-Grade Quality Without the High Cost

5000 ISO Lumens with 4K resolution and a 5,000,000:1 dynamic contrast ratio in a compact, accessible package – perfect for storefront displays, ambient projections, or digital signage that stands out day and night.

Whisper-Quiet Operation

Quieter than a soft conversation, TITAN runs at <28dB at 1 meter distance in standard mode – hear the movie, not the machine.

*28dB@1m@Silent Mode
38dB@1m@Standard Mode
