Over-Ear Design

Comfort for long working sessions

Semi-Open Technology

Solid bass and clear highs

Patented Varimotion 30 mm XXL Transducer

Accurate signal transfer and great dynamic range

Self-Adjusting Headband

Provides optimum fit every time

The Choice of Professionals Around the World

Stage and studio standard for more than two decades

The AKG K240 MKII professional over-ear, semi-open headphones carry on the success of their predecessor—the AKG K240 Studio—and are a standard in studios, orchestras and on stages around the world. Their advanced 30 mm XXL transducers with patented Varimotion diaphragms deliver a wide dynamic range, increased sensitivity and high sound levels, while their semi-open design provides the airiness of open headphones with the powerful bass response of closed designs.

With impressive accuracy, musicians, producers and engineers rely on the AKG K240 MKII to clearly hear mixing details, which has made these headphones a standard in recording settings. In addition to great sound quality, the headphones are extremely durable and comfortable. Not only built to withstand the demands of countless hours in the studio, their self-adjusting headband provides an ideal fit and their over-ear pads nicely envelop the ears. The AKG K240 MKII headphones also feature a professional mini XLR connector and come with a 3 m (10 ft) straight cable, 5 m (16 ft) coiled cable and convertible jack plug for connecting portable equipment easily. Altogether, from performance and ease of use to comfort and reliability, the AKG K240 MKII is a powerful tool for production environments.

KEY MESSAGES ■

Hear the Details

Take your recording, mixing, editing and monitoring to the next level with the AKG K240 MKII headphones. Designed to enhance production, these headphones deliver the powerful bass response, crystal clear highs and accuracy needed for professional applications.

Produce in Comfort

Built for those long recording sessions, the AKG K240 MKII headphones provide an ideal fit. With their self-adjusting headband and over-ear pads, these cans allow musicians, producers and engineers to spend studio time in comfort.

Crafted for Excellence

As a leader in audio performance, AKG continues to raise the bar in providing exceptional sound quality. The K240 MKII headphones are no exception as their 30 mm XXL transducers and patented AKG Varimotion diaphragms deliver professional-grade sound.

The Industry Standard

With their powerful sound performance, comfort and durability, it's not surprising that industry professionals around the world have made the AKG K240 MKII headphones the standard in the studios, orchestras and live performances.
