DANMARK

 Chromecast built-in

- GOOGLE CHROMECAST BUILT-IN
- BLUETOOTH
- 2 X 3" LOUDSPEAKERS
- DANISH DESIGN

The new Tangent Spectrum W1 features both Bluetooth and Google Chromecast integrated within this stylish and compact speaker, providing the ultimate freedom to stream your favourite music from any portable mobile device.

Google Chromecast enables you to stream music wirelessly using your Wi-Fi network and offers higher quality audio than traditional Bluetooth streaming. Set up is easy and without the need of complex installation or troublesome pairing between the speaker and mobile devices. Simply open Spotify, Google Play Music or another music or radio app, tap the Cast button on your mobile device and enjoy your favourite music in crystal clear stereo.

During playback, you can control the music selection and volume of the speaker manually or directly from your mobile device. Once the speaker is streaming, you can answer calls on the phone, play a game or move around without interrupting your music.

When you can't access a Wi-Fi network and want to stream music or radio to your Tangent Spectrum W1, simply pair your mobile device with the speaker wirelessly via Bluetooth, or connect the speaker with the cable supplied using the AUX (mini jack) input on the rear panel.

The uniquely designed, twin full-range drive units housed in each side of Tangent Spectrum W1's cabinet deliver an incredibly rich and full-bodied stereo sound. You can also choose between 8 pre-set EQ audio settings to ensure the type of sound reproduction matches your personal music taste.

The Tangent Spectrum W1 has been designed with a clean and minimalist Scandinavian aesthetic, based on the award-winning Tangent Spectrum loudspeaker series. The cabinet is available in attractive and durable black or white matt finishes with an elegant walnut veneer wooden base plinth.
